BOROUGH OF LYDD (KENT)

ANNUAL REPORTS OF THE MEDICAL OFFICER OF
HEALTH AND PUBLIC HEALTH INSPECTOR FOR
THE YEAR 1962

Mr. Mayor, Alderman and Councillors,

I have the honour to present to you my Annual Report for the year 1962.

Population

The Registrar General's estimate of the mid-year Home Population was 3,440 which was an increase of 750 over that of the previous year.

Live Births and Birth Rate

The number of live births was 52, (28 M. 24 F.) i.e. 9 more than the previous year, and the crude birth rate was accordingly 15.12; after adjustment by the Registrar General's Comparability Factor which is computed from a population standardised for age and sex distribution, the rate becomes 14.97 and was appreciably lower than that of 18.0 for England and Wales.

Stillbirths and Rate

This rate was nil as there were no stillbirths.

Infantile Deaths and Infantile Mortality Rate

One infant death was registered due to:- Prematurity (1 hour).

The Infantile Mortality Rate was accordingly 19.23 compared with that of 21.4 for England and Wales. (These figures are, however, too small for valid comparative rates).

The hard core of causes of Perinatal Mortality (i.e. stillbirths and infant deaths under one week of age) is prematurity, asphyxia and atelectasis, birth injuries and congenital malformations and the chief maternal factor is toxæmia of pregnancy.

Maternal Deaths and Maternal Mortality Rate

This rate was nil as there were no maternal deaths and is a reflection of the high standard of modern obstetric practice.

Total Deaths and Death Rate

The total number of deaths from all causes was 32 (20 M. 12 F.) and the crude death rate was accordingly 9.30 which, after adjustment by the Registrar General's Comparability Factor, as for births, becomes 11.63 and was lower than that of 11.9 for England and Wales.

The chief group cause of deaths was those from natural causes amongst the aged, namely Heart and Circulatory Diseases and Vascular lesions of the Nervous System; of those there were 11.

Disease of the Coronary Artery of the Heart was the cause of one male death, aged 56 years.

Cancer, as invariably in previous years, was the second highest cause of deaths; of those there were 9. Having regard to the insidious nature of the disease, delay by elderly persons is the most common factor associated with late diagnosis when the disease has become too advanced for other than palliative treatment.

Cancer of the Lung was the cause of 3 deaths, all male, aged 68, 73 and 75 years, compared with one in the previous year.

The other causes of death were miscellaneous and there was no exceptional mortality.

The Infectious Diseases

Apart from the bi-ennial outbreak of Measles and an outbreak of Food Poisoning at the Nuclear Power Station, the incidence of the notifiable Infectious Diseases was minimal throughout the year. There was no case of the more serious Infectious Diseases, namely Poliomyelitis, Diphtheria, Enteric Fever, Meningitis or others. It is noteworthy to record that no case of Whooping Cough was notified and in all probability this was due to the effect of preventive vaccination.

Measles

There was the expected bi-ennial outbreak of Measles, 191 cases having been notified. The virus is always present amongst children and outbreaks occur when a sufficient number of susceptible children has accumulated. Its serious complications such as Broncho-pneumonia and Acute Otitis Media occur relatively infrequently today and when they do occur the Sulpha drugs or Antibiotics are invariably specific in treatment. Occasionally Acute Encephalitis occurs during an epidemic.

Food Poisoning

There was an outbreak of Food Poisoning at the Nuclear Power Station in February, 25 cases having been notified.

The causal organism was *Clostridium Welchii* which was isolated from Hamburger, consisting of refrigerated stewing beef, eggs, onions and carrots, and having been cooked in the morning & served between 12 noon and 1 p.m. on the same day. The average interval between the consumption of this meal and the onset of symptoms was 6 - 12 hours, the onset of diarrhoea having been the presenting feature, with slight vomiting in a few cases. The duration of the diarrhoea (greenish mucoid stools) was between 24 - 48 hours. *Cl. welchii* was also isolated from the stools. The illness was of moderate severity and all fully recovered. The meat had been supplied from a local slaughterhouse.

Acute Primary or Influenzal Pneumonia

Only one patient with this illness was notified. Including the secondary Pneumonias which are not notifiable, there were four deaths.

No other cases of Infectious Disease were notified.

Tuberculosis

It is noteworthy to record that no new case of Respiratory and Non-Respiratory Tuberculosis was notified. Known as the 'White Plague' for centuries, a new era has been reached in the protracted struggle to eliminate this disease which has necessitated a variety of different angles of attack.

Also there was no death which is a reflection of the success of modern treatment.

In conclusion, I would state that the Public Health of the Borough was very satisfactory throughout the year, and I would like to take this opportunity of thanking you for your interest in the work of the Department and the staff for their efficiency and co-operation.

I am,

Central Public Health Office,
14, Church Road,
Ashford, Kent.
Tel: No: Ashford 1485.

Your obedient Servant,

J. MARSHALL M.B., Ch.B., D.P.H.

STATISTICAL AND SOCIAL CONDITIONS OF THE DISTRICT
FOR 1962

Area:- 11,932 acres

Registrar-General's Estimate of the Resident Population ...	3,440
Number of Inhabited Houses According to the Rate Books ... (excluding business/dwelling houses)	1,120
Rateable Value ...	£59,414
Sum Represented by a Penny Rate ...	£225

SOCIAL CONDITIONS

The ancient town of Lydd is situated in the extreme S.W. corner of Kent, part of its western boundary coinciding with the boundary between Kent and Sussex. The Borough of Lydd, the most extensive borough in the County, comprises the old town of Lydd, Dungeness, Lydd-on-Sea and part of Greatstone, the three latter areas being on the sea coast. Its 12,000 acres occupy the majority of the well-known foreland of Dungeness, and the resident civilian population is a little under 2,700, although this figure is multiplied several times over in the holiday season. The population is increased to about 3,500 when Lydd Camp is occupied by an Army Unit. The area is very flat, and visibility is good. Within the boundaries are to be found the best and the poorest of soil formations - rich alluvium providing fattening pastures for at least ten sheep per acre, and vast areas of shingle which although a very poor 'soil' does, nevertheless, support some forms of hardy plant life.

The Borough is predominantly agricultural in character, being chiefly concerned in sheep and cattle raising and arable farming. There are a number of extensive beach quarrying and crushing plant within the district. The War Department own approximately one-sixth of the Borough, from the West end of the High Street down to the sea. Within that area are Lee, Metford and Clarke Camps and extensive anti-tank, mortar and rifle ranges. Lydd (Ferryfield) Airport is situated one mile from the centre of the town and many thousands of passengers and cars, in addition to large quantities of freight, are transported to and from the Continent.

There are $9\frac{1}{2}$ miles of coastline, and of the coastal sub-districts, Dungeness is largely devoted to the fishing industry, and Greatstone, where there is a large Holiday Camp, and Lydd-on-Sea, cater chiefly for the holiday makers. Development for residential and holiday purposes continues with no sign of abatement in the last-mentioned two areas.

The Council have provided 188 permanent dwellings, as follows:-

	Houses			2-storey flats 2 bed	Old persons bungalows	
	4 bed	3 bed	2 bed		2 bed	1 bed
Pre-war period	-	26	-	-	6	-
Post-war period	10	78	24	28	-	16
	10	104	24	28	6	16

In addition, the Council own a further 6 houses not originally provided by them.

At the beginning of October, work started on a contract for the erection of 36 houses to be occupied by the key operational staff of Dungeness Nuclear Power Station. This was the first instalment of a scheme for providing 100 houses, 50 by Lydd Borough and 50 by New Romney Borough Council, previously agreed with the Central Electricity Generating Board.

During 1962, work on the construction of Dungeness Nuclear Power Station proceeded in accordance with the scheduled programme. When completed in 1965 this station will have an output of some 500/550 megawatts of electricity. The interchange of electric power between this Country and France via the 275kV super-grid from Canterbury, the Converter Station near Pigwell, Lydd and the Cross-Channel Cable, officially inaugurated on a commercial basis in December, 1961, continued during the year.

The 'caravan' problem, brought about by the influx of personnel employed by the various contractors constructing the Power Station, occupied a great deal of Committee and administrative time during the year. 14 licences under the Caravan Sites and Control of Development Act, 1960, in respect of sites for 39 caravans, were issued during the year.

In pursuance of powers conferred by Section 40 of the Highways Act, 1959, the Council entered into an Agreement whereby 24 private estate roads at Greatstone and Lydd-on-Sea, some $5\frac{3}{4}$ miles in length, were taken over by the local authority, and became maintainable at the public expense from the 15th August, 1962.

Towards the end of the year, the Council received from their Consulting Engineers a preliminary report on proposals for providing main drainage for the part of the town area of Lydd not already connected to the main sewer.

Community life in the area is very much in evidence. Local organisations and societies cover a wide range of interests and activities, and include Men's and Women's Branches of the British Legion, a Branch of the Royal Naval Association, Benefit Clubs, Women's Institute, Mothers' Union, Women's Voluntary Services, Lydd Traders' Association, a Ratepayers' Association, Parents' and Teachers' Association, the War Memorial Institute Club, Scouts, Cubs, Guides, Brownies, Folk Dancing Club, and the Lydd Seniors' Club for the elderly. The Clubs and Societies combine their efforts in organising the now widely-known 'Lydd Club Day' on the third Saturday in June each year.

There is virtually no unemployment, and social conditions are generally satisfactory.

EXTRACTS FROM VITAL STATISTICS

	<u>Total</u>	<u>M.</u>	<u>F.</u>		<u>Lydd Borough</u>	<u>England and Wales</u>

SANITARY CIRCUMSTANCES OF THE AREA

Water Supply

The Folkestone and District Company supplies the Borough from shallow wells sunk in the shingle and sand of the Denge Marsh and the supply has been adequate.

No new mains have been laid within the Borough during the year and the proportion of dwellings in the Borough with mains water supply continues to be in the region of 98%.

Examination of Water Supplies during the Year

		<u>Bacteriological Examination</u>			<u>Chemical Examination</u>		
		No. of Samples	Satisfactory	Not Satisfactory	No. of Samples	Satisfactory	Not Satisfactory
